

## ACRO CRO Forum Charter

The ACRO CRO Forum (“the Forum”) is established with an initial purpose to interact with TransCelerate Biopharma Inc. The Forum shall provide a mechanism for CROs, both ACRO members and participating non-members, to provide industry input into appropriate TransCelerate workstreams and to report back to Forum participants on TransCelerate developments. For those workstreams mutually identified by ACRO and TransCelerate as appropriate, the Forum and TransCelerate will each identify a liaison to communicate in any of a variety of ways, (such as teleconferences, sharing of documents, and other interactions, including in-person meetings,) as may be useful and necessary to keep both organizations informed about the other’s activities and positions on significant workstream matters. The Forum may also propose new workstreams to TransCelerate. The TransCelerate workstream team leader or other primary contact may be assisted by the workstream’s project management staff, and the Forum liaison may be supported by an ACRO staff person for administrative functions such as minute-taking in order to facilitate reporting within the Forum. The Forum will elect a Chair who, along with the Executive Director, shall report to the ACRO Board regarding Forum-TransCelerate activities. As with existing ACRO committees, the Forum will be staffed by ACRO, and procedures for regular in-person and teleconference meetings of the Forum will be established.
