As a hub for global clinical research and technology companies, ACRO facilitates cross-industry collaboration with diverse stakeholders to create an enabling environment for our members.

ACRO membership enhances BUSINESS OPPORTUNITIES for its members by forging strong, positive relationships. We enable networking between peer companies, and engagement with sponsors, regulators, policymakers and other stakeholders. Join us and add your voice. Visit ACROHealth.org/join to learn more.
ACRO DELIVERS VALUE FOR THE CLINICAL RESEARCH INDUSTRY

The Association of Clinical Research Organizations (ACRO) represents companies on the forefront of global clinical research and champions the shared interests of the industry.

A UNIQUE VOICE

Each year, ACRO members support the conduct of the vast majority of clinical trials worldwide, involving more than one million research participants and 130,000 skilled employees. This broad impact means that clinical research and technology companies have unique interests. **ACRO is their voice to the world.**

A NETWORK OF COLLABORATION AND ENGAGEMENT

As a hub for organizations of diverse sizes and specialties, ACRO advocates on behalf of its members while elevating the profile of the industry.

ACRO connects members to stakeholders like EFPIA, PhRMA and BIO, while our CRO Forum enables members to interact with TransCelerate. We build relationships with regulators from the FDA, EMA and European Commission, positioning members as essential stakeholders. **Our working groups facilitate thought leadership, industry-wide discussion and action on key issues.** ACRO helps members make more informed decisions to enhance their distinct business strategies.

COMMITTEES AND WORKING GROUPS

ACRO has active committees on industry-specific issues: Ethics and Regulatory Compliance, EU Scientific and Regulatory, Industry Pain Points, Global Data Protection and Privacy, the CFO Roundtable and Communications.

ACRO’s **CRO Forum** serves as a formal mechanism for interaction with TransCelerate BioPharma Inc. The Forum is comprised of member company representatives, as well as CROs outside of ACRO, and currently engages with TransCelerate on: Risk-Based Monitoring, eSource, Pharmacovigilance and the Shared Investigator Platform (SIP).

JOIN US

At the center of a healthy world is clinical research. At the center of clinical research is ACRO. We help create a predictable, enabling business and policy environment where members succeed. **The future of clinical research will be shaped by ACRO members and the work that we do – together.**
